Hardin County Master Gardeners**

**Ohio State University Extension
Hardin County**

Propagation Methods – Have you ever tried to start plants from seeds only to be disappointed in the result? You are not alone! We will look at starting plants from seed, cuttings and division. What does it take to get a seed through the ground and to a transplant size to put into your garden? Find out why some seeds will not grow the first year. It may not be as difficult as you think.

Edible Ornamentals : The Marriage of Use and Beauty. Today's gardeners want gardens and landscapes that fulfill multiple functions. What better way to tap into this trend than to include plants that are pleasing to see, smell and taste. The concept of edible landscapes dates back to ancient times. Why not add edible trees, shrubs and herbaceous plants to your design palette?

Attracting Birds to your Landscape – Creating different habitats in your yard to attract different bird species. The benefits that native plants provide to birds.

Container Gardening – What can you grow in containers? What kind of containers? What are the soil, light and water requirements of container gardening? Hopefully all you will need to be a successful container gardener this year.

Speakers

David McPheron – With a degree in Horticulture, Dave is the owner of Star Farms Native Plants. He gathers local seeds and grows those into plants to sell for landscapes. Currently an emeritus MG, he was an active Ohio State University Extension Master Gardener Volunteer for 16 years and served as the Hardin County Volunteer Coordinator for 7 years.

Debra Knapke – A garden designer since 1994, Debra has a Masters degree in Horticulture and runs a design and consulting business. Known as the Garden Sage, she has co-authored six books, shares a blog on Midwest gardening and has taught classes on Horticulture and garden design for 24 years.

Jimmy Giannone is the Pheasants Forever wildlife biologist in Hancock, Hardin and Wyandot counties. He is a graduate from West Virginia University with a degree in wildlife and fisheries resources.

Timothy McDermott, DVM is an OSU Assistant Professor and has been an Extension Educator in Agriculture and Natural Resources for the past six years. He lectures locally as well as internationally on Local Food Systems and Veterinary Sciences where he spent 20 years in private practice.
